1953 INDEX
VOLUMES 49-50

As a service to our readers we are again presenting a complete listing of all feature articles which appeared in RADIO & TELEVISION NEWS during 1953. We suggest you keep this for reference.

AMATEUR

ANTENNAS

A Multi-Band, Constant Impedance Antenna (Graf, W5LFM)..... 72 Sept.
Improved 10-Meter Mobile Antenna (Hargrove, W4BSO) .....172 Dec.
The Broomstick Boomstick (Wagner, W6WGD) .....116 Mar.
3-Element 14 mc. Rotary Beam Antenna (West, W2IYG)..... 66 Feb.

CONVERTERS

"Converterless" 75-Meter Mobile Reception (Shannon, VE7AGE)...174 Sept.

MISCELLANEOUS

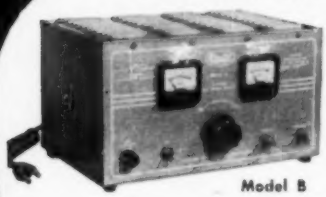
A Better Electronic Key (Gallagher, W5HZB) ..... 52 Jan.
A Compact Bandswitching V.F.O. Multiplier (Snader, WØZFO)..... 52 Feb.
A $5 Low-Pass Filter (Rountree, W5CLP) ..... 47 June
A New V.F.O. (Wilson, W5DAD)..107 Nov.
A Noise Limiter Deluxe (Hoefer, WØIIJ) ..... 76 May
A Plug-in Modulator (Taylor, W8NAF) ..... 77 Dec.
A "Small-Package" Modulator (Brauner, W2URF) .....103 Nov.
A Transistor Code Practice Oscillator (Garner) ..... 40 Apr.
A 200 mc. R.F. Amplifier (May, W5AJG) ..... 68 Dec.
Break-in Without Relays (Brown, W6TWW) ..... 55 Sept.
Hints and Kinks for Mobileers (Najork, W2HNH) ..... 84 Aug.
Modernize Your "Bug" (Clemens, W9ERN) ..... 39 Apr.
QRM-Cutting Selectivity for the Mobile Receiver (Brown, W2CVV) 60 May
Reviving the Jam-Jar Rectifier (Robberson) ..... 61 Dec.
Speech Filters for Amateur Receivers (French, W1JKZ) ..... 74 Sept.
Simplified Crystal I.F. Filter (Cameron, W8IVJ) .....144 Nov.
6BQ7A Cascode 10-Meter Preamp (Lownsbury, Jr., W2QKA).....129 Nov.
The Monimeter (Broderson, W6CLV) 47 July
The "Transdipper" (West, W2IYG). 60 Oct.
Transistor Band Spotter (Sulzer, W3HFW) ..... 52 June
25-Watt Utility Unit (Anglado)..... 66 Jan.
Why Use a Condenser? (Wagner, W6WGD) ..... 40 June

TRANSMITTERS

A Midget Self-Contained 15-Watt Transmitter (Shalna, W2LBU)... 66 Apr.
A "Minimum" Mobile for 10-Meter CD (Finkbeiner, W8AQK)..... 52 July
A Simple Facsimile System for the Amateur (Roberts) ..... 45 Dec.
Foolproof 2-Band Transmitter (Cameron, W8IVJ) .....116 Dec.
Inexpensive Novice Station (Part 1) (Trombly, WØDCB & Hathaway, WØGTK) ..... 52 Sept.
Modernizing the SCR-274/N Transmitter (Hays, W6RTP) ..... 58 Jan.

Prescribed by top mfrs.*

For operating and testing DC equipment from AC lines



Model B

Electro ELECTRONIC EQUIPMENT

FILTERED DC POWER SUPPLY

Pat. 2599748

They say: "It's the *only* one that can withstand continuous high overloads!"

Cooler Operation—Selenium rectifier application and conduction cooling dissipate over 3 times the heat.

Twice the Rectifier Power Rating with EPL Patented Design. **Lowest Cost Per Ampere Output.**

Output 6v., 1-20 amps. (35 at peak). 2 units in parallel supply 6v. at 40 amps.

Tests 2 Auto Radios with push-button solenoids at same time; also motors, instruments, relays, other low voltage devices.

NEW MODEL C-12 services both 12v. and 6v. auto radios.

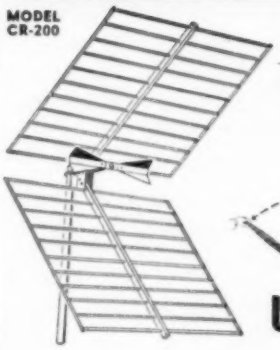
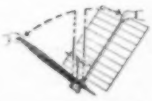
MODEL CR-200



Another First by

MILLER
TELEVISION CO.

JOHN MILLER
"The Man Who Knows"



Install in 30 seconds. Comes completely pre-assembled.

UHF Bow-tie Corner Reflector

A rugged antenna that comes completely pre-assembled. Install in 30 seconds by merely opening like a book. Broad band on all UHF channels. Especially effective in difficult installations. Reflector screen of ¼" aluminum elements with aluminum channel rim. Featuring the new Miller unbreakable UHF molded hi-impact styrene insulator. As with Miller's complete line of realistically priced UHF and VHF antennas, Model CR-200 is ready for immediate delivery with a money back guarantee. Another first from Miller Television . . . the West's pioneer producer of television antennas.

LIST PRICE **$8.95**

More than 1 million antennas built since 1948

Miller TELEVISION CO.

Build Your Own Interior-Styled Cabinets

KITS by Cabinart

presenting the

paul klipsch-designed REBEL IV . . .

Now you can build your own Klipsch Corner Horn Enclosure and save money — identical in acoustic design to assembled units and easily put together with a minimum of tools. Priced for the home-builder in unfinished birch.

$36.00* Net for 12" model

$42.00* Net for 15" model

BASS REFLEX and EQUIPMENT CABINETS

Ideal housing for hi-fi components . . . removable panels make future changes easier. Loudspeaker cabinet acoustically-designed for either 12" or 15" speaker.

Overall dimensions: 33½", 23", 16". Tuner Compartment: 20" H., 21¼" W. (inside dimensions), 15¼" deep. Baffle Volume: 6 cubic feet.

All kits include ¾" white pine plywood cut to size, baffle precut for 12" or 15" speaker. Saran Plastic Acousticloth, Kimsul Acoustic Insulation. Assembly and finishing instructions, hardware, plastic wood, sandpaper and glue.

No. 80 . . . $27.00 * (Equipment kit)

No. 8112 . $18.00 * (12" speaker)

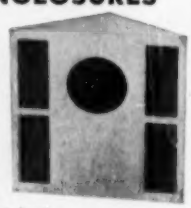
No. 8115 . $18.00 * (15" speaker)

CORNER FOLDED HORN ENCLOSURES

Reproduces a quality of bass heretofore only possible through the use of far more expensive designs.

No. 61 (12" speaker) . . $19.95 *

No. 63 (15" speaker) . . $23.95 *



* Prices higher West and South.

HARVEY RCA AUTHORIZED DISTRIBUTORS

RCA Tubes and Harvey Service...
For Double Dependability!

HARVEY's line of RCA tubes is so complete, that HARVEY can fill virtually any requirement . . . right from stock . . . and *deliver at almost a moment's notice.*

This is particularly important to AM, FM, and TV Broadcasters, Industrial and Commercial users, Amateurs, and Service-Technicians, all of whom depend on tubes for sustained operation of important electronic equipment.

Write, Wire, or Phone, for Prompt Harvey Service.

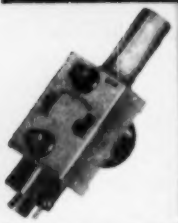
TV SERVICE ESSENTIALS



No. MA-4 Pocket Size Bar Generator
Provides actual bar pattern on TV receiver screen, portable and lightweight for on the spot linearity adjustments. Can be used when no stations are on the air to produce adjustable number of horizontal or vertical lines. Plugs on picture tube.
$18.25 List Price

No. MA-4-AC DeLuxe Bar Generator
Completely self-powered pocket size Bar Generator. Obtains operating power from wall outlet. Usable on all TV sets . . . provides serviceman with a foolproof pocket sized Bar Generator that produces an adjustable number of horizontal or vertical lines. Plug-in unit.
$24.00 List Price

Picture Tube Rejuvenators
Renews brightness of low emission CRT. 4BB for magnetic or electrostatic CRT, parallel filaments.
$2.75 List Price
49C For standard focus CRT, parallel filaments.
$2.50 List Price
50D For magnetic or electro-static focus, series filaments.
$3.40 List Price
51E Isolation rejuvenator for weak CRT having inter-element leakage. For any CRT using parallel filaments.
$3.00 List Price

No. LVB-117 Line Voltage Booster
Corrects for low or high line voltage. 350 watts, for line voltages from 90 to 135 volts. Multi-tap selector and neon indicator for exact voltage boost. Fused to protect against sudden voltage increases.
$17.95 List Price
No. 3021 LVB Jr. (not shown) Budget Priced 250 watts, for 10 volt boost or straight through line. Priced for economy. **$6.75** List

No. 200K Variable Inductance, Universal Substitution Kit
For video, IF circuits; 8 variable coils cover range from 1 to 590 μh; Q Max impregnation. Data enclosed on L min, L max, Q, R, C dis., Res. Freq. Individual calibration charts permit adjustment without test equipment.
$7.95 List Price

No. 10A Multi-Channel Converter
Pre-tuned for single channel application. Adjustable over 15 channel range without use of instruments. Double tuned, silver plated, high Q preselector. Single switch for on-off, VHF-UHF. Model 10A obtains its power from receiver through octal adapter plug. Model 10B complete as above but with 7 Pin adaptor plug.

THE NEW TV DYNATRACER

ONLY $4.95 Ppd. or C.O.D. + Chgs.

- TRACES TV SIGNALS AND VOLTAGES
- LOCATES DEFECTIVE COMPONENTS
- REQUIRES NO ADDITIONAL EQUIPMENT

This sensationally new piece of test equipment is ideal for trouble-shooting television sets in the home or in the shop. The "DYNATRACER" will out-perform more expensive testers and should pay for itself on the very first repair.

A Must for Every TV Technician

SPECIFICATIONS: The "DYNATRACER" is a self-powered quality test instrument designed to trace TV signals through any Video, Sound, Sync, AFC, Horizontal or Vertical Sweep Circuit—will isolate trouble to a stage or component.

ADDED FEATURE: The "DYNATRACER" will also trace voltages 150/500 V. AC/DC and instantly locate open, shorted, intermittent or leaky (up to 20 MEGOHMS) condensers, resistors, coils, XFormers, etc.

Instruction and Trouble-Shooting Book Enclosed
10 DAY MONEY-BACK GUARANTEE

Spot TV trouble symptoms at a glance
. . . . fix them twice as fast!

Now! HANDLE UP TO 90% OF TV SERVICING BY PICTURE ANALYSIS

New short cut way of handling television service can save you hundreds of dollars worth of time

FAST! EASY TO USE! Hours of tedious, time-consuming troubleshooting can be cut to minutes. Repairs can be made twice as fast! Just "dial" the new Ghirardi PIX-O-FIX TV TROUBLEFINDER GUIDE until the actual TV screen photo appearing in its "window" matches the screen picture on the defective set you are repairing. The proper Trouble Key Number also appears on the guide. This directs you to the tabulation giving all possible causes of this particular trouble and the stage or section of the receiver in which it is most likely to occur.

But this only the beginning! The Pix-O-Fix Guide not only helps you locate the trouble quickly but then also shows you exactly how to fix it. Step-by-step repair instructions follow. In most cases; the particular component most likely to be faulty is specified. Quick tests to apply to it are explained. If part substitution is likely to be more effective than an instrument test, this is recommended.

COVERS ALL MODELS!

PIX-O-FIX is applicable to all television receivers. Operation is clear and simple. Money-back guarantee if you're not more than satisfied!

PIX-O-FIX

TV TROUBLE FINDING GUIDE

By Ghirardi & Middleton

- **24 COMMON** television troubles identified by actual TV screen photos.
- **190 POSSIBLE** causes of these troubles identified and localized to the particular stage of the receiver where they are most likely to occur.
- **253 DEFINITE,** easily understood remedies for these troubles.
- **4,500 WORDS** in CAUSE and REMEDY section to explain exactly what to do.

NOTE! *Ghirardi's PIX-O-FIX is designed and sold as a professional TV service device for servicemen—NOT as a "fix-it-yourself" gadget for use by consumers.*

Only $1. **10 DAY Money back Guarantee**

Dept. RN-123, Rinehart Books, Inc., Technical Div.
232 Madison Ave., New York 16, N. Y.

Enclosed is $1 for which please rush a PIX-O-FIX TROUBLE FINDER GUIDE. If not satisfactory, I will return it postpaid within 10 days and you guarantee to refund my $1.

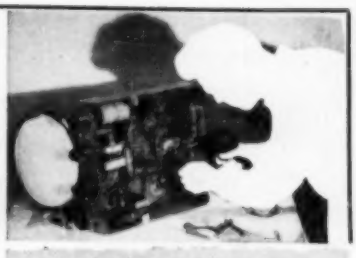
Let MILTON S. KIVER Help You Prepare For U.H.F.-TV And...

TELEVISION SERVICING



Easy to TRAIN AT HOME This Practical Way!

Men with the right training in Television Servicing are in big demand . . . pull down big pay. T.C.I. TRAINS YOU RIGHT with easy-to-follow technical training designed *by* servicemen, *for* servicemen! You learn practical, professional type Television Servicing without leaving your present job. Included are money-making extras such as set conversion, master antenna installation, U.H.F.-TV and field servicing short cuts. You can start earning Television money after the first few lessons. You learn to test, trouble shoot and repair all types of TV sets the proven, *practical* way!

HERE'S HOW YOU GET EXPERIENCE!

You train on your own large screen modern television receiver, furnished as part of your course. This set is yours to keep! As an optional feature you can get two weeks of actual field experience out on service jobs and on the repair bench for Chicago's largest independent servicing organization. You learn Television Servicing by *actually doing* Television Servicing . . . you get the *practical* know-how you need to qualify for BIG MONEY in this fast-growing field! **Age is no barrier. Many TCI students are over 40!**

VETERANS! T.C.I. is approved for G.I. training under Public Law 550. Check coupon.

ACT NOW! Mail coupon for FREE Catalog and SAMPLE LESSON. Write TODAY!

YOU GET and keep modern large screen Television receiver.
YOU DO actual testing, servicing, trouble shooting and repairing

BEGINNERS! LEARN ABOUT NEW BASIC TV COURSE!
You don't need radio experience for practical, home-study training in Basic Television. Start earning money in TV after first few easy lessons. Check coupon for details.

DAVIS ELECTRONICS
CHALLENGES
THE TV ANTENNA MANUFACTURING INDUSTRY
AN OPEN LETTER:

"In the interest of PROTECTING Electronics TV Dealers from the huckster practices of releasing sales propaganda disguised as 'technical information' WE CHALLENGE THE INDUSTRY TO SET UP STANDARDS.

"We believe that all technical information released to the trade should have the dignity which the phrase 'technical information' implies . . . This technical information should come from RECOGNIZED INDEPENDENT RESEARCH and/or TESTING LABORATORIES to insure its accuracy."

Trade Mark Reg. (First use)

Jack Moore, *Sales Manager*

DAVIS ELECTRONICS DIDN'T WAIT

We foresaw what was, and is, happening in the TV Antenna Industry. We now provide the Dealer with facts—not fiction.

Securing the actual "technical information" was a long and costly process, but we knew how valuable it would be for you to have.

We invite comparison with any other TV antenna that is tested by a competent testing research institution.

TO BACK UP OUR CONVICTIONS, DAVIS SUPER-VISION ANTENNAS ARE SOLD WITH A DEALER NET PRICE MONEY-BACK GUARANTEE "to perform to the dealers' satisfaction."

WE HAVE PROTECTED DEALERS: We provide Dealers with FACTS about the Unexcelled Performance of the Davis Super-Vision All-Channel VHF Antenna. This is contained in a NEW CATALOG FOLDER & TECHNICAL BULLETIN—and if you want to give your customers the finest television reception, write for your copy.

EDITORIAL CONFERENCE

THE second Conference on Scientific Editorial Problems will be held Dec. 27 in Boston during the annual meeting of the American Association for the Advancement of Science.

The purpose of the meet is to bring before the group some of the important problems that confront those who prepare scientific manuscripts, technical reports, or edit and produce scientific publications. The meet is open to the public. —30—

OIL CONDENSER
15 MFD. 600 VOLTS
made by
WESTINGHOUSE
#CAY-481758-10

This condenser will make a perfect filter for WILLIAMSON amplifiers, transmitters and other applications where low noise and leakage is necessary. Rated at 600 volts these condensers are now seeing duty at 1000 volts.

A TERRIFIC VALUE
Dimensions: 4½", Wd. 2⅞", D. 2⅜"
Brand new factory fresh. Made to last a lifetime.
$2.49 ea., 6 for $13.50

METERS (BRAND NEW)

Weston 3½" Rd 0-150 Volts AC	$8.95
Westinghouse 4½" Square 0-15V AC	$7.95
W.E. 3½" Rd 0-10V DC 1000 ohms per V	$4.95

FT-241-A CRYSTALS
Mfd. by W.E. Brand new
Frequency in Meg. 20.4, 20.5, 20.6, 20.7, 20.8, 20.9, 21.2, 21.3, 21.7, 22.0, 22.1, 22.2, 22.4, 22.7, 22.8, 22.9, 23.0, 23.3, 24.4, 24.5, 24.6, 24.7, 24.8, 26.4, 26.9.
$.49 ea. or 6 for $2.49

VARIAC CONTROL PLATE KNOB
Type 200C 4" Diameter
1 side calibrated for 115 Volt line, other side calibrated for 0-135 Volts.
$.89 each or 3 for $2.50

FP. ELECTROLYTIC CONDENSERS
(Guaranteed Perfect)

Cap.	W. Volts	Price
20	450	$.44 or 3/1.19
40	450	$.54 or 3/1.49
1000	15	$.69 or 3/1.89
1000	25	$.89 or 3/2.49
8-16	450	$.59 or 3/1.59
40-40	450	$.89 or 3/2.49

NEW THEORY REVOLUTIONIZES VHF UHF TV ANTENNAS

THE OCTO-TENNA
MOST POWERFUL TV ANTENNA MADE

This antenna has been developed under a new theory which GUARANTEES best possible reception anywhere on every frequency range above 55 megacycles with the lowest interference to signal ratio. EASY TO ASSEMBLE • MOST CONVENIENT TO INSTALL • LOW WIND RESISTANCE

The insulator is practically indestructible, made from the best grade laminated wood well preserved. Patent pending.

Electronic Light Control

(*Continued from page* 81)

plate end of the resistor will be negative with respect to the other end.

The second amplifier tube, V_{1B} is hooked up so that its control grid is connected through a large resistor, R_3, directly to the negative end of the plate load resistor of the first amplifier tube V_{1A}, and its cathode is connected to the positive end of the same resistor. Because of the large drop across R_4 when no light shines on the photoelectric cell, the second amplifier tube will be biased beyond cut-off. Inspection of the schematic will disclose a large condenser between the grid and cathode of this tube. The condenser and the resistor, in series with the grid, form a time delay circuit to slow down the action of the circuit. In this way momentary light flashes such as lightning, etc. will not turn the controlled lights off.

Since there is no plate current flowing through the second amplifier tube, V_{1B}, the relay coil is not energized, the contacts are closed, and the controlled lights are on.

Regarding the action when light strikes the phototube, the presence of a bright light on the phototube cathode causes the tube to pass a large current and thus develops a large voltage across the phototube's load resistor R_1. This biases the first amplifier tube, V_{1A}, to beyond cut-off. No plate current through the tube means that no voltage drop will be developed across the plate load resistor, R_2, and no bias will be developed on the second amplifier tube, V_{1B}.

When the second amplifier tube, V_{1B}, has no bias, it draws a large plate current through the relay coil, the relay is picked up, the contacts are opened and the controlled lights are turned off. —30—

ADDENDUM

In regards to the "Ferri-Loopstick Crystal Receiver" (July 1953 issue) the circuit as published is correct, although reports indicate some readers are having difficulty. One important point not covered in the article is that the phones to be used should be at least 2000 ohms d.c. resistance or up to 24,000 ohms impedance. Low impedance or crystal phones will not work.

- POWERFUL 8 TUBE CIRCUIT
- 10" PM SPEAKER
- THREE BANDS

Offers all the advantages of a large size console set in minimum space and for very moderate cost. Features include: 3 bands, 540-1600 kc, 2.4-6.6 Mc, 6-17.6 Mc. Well-designed five tube plus rectifier circuit. Tubes: 2-12BA6, 12BE6, 12AT6, 6V6, 6X4. Power output is 3 watts undistorted to 10" high quality PM speaker. Has provisions for external antenna, phono pickup, and power to phono. AC only. Extra plug for use on 220 volts AC (export). Handsome cabinet-maker's hand finished genuine Mahogany veneer cabinet 21½ L x 11¼ H x 6¼" D. Available in Blonde or Mahogany finish. Shpg. Wt. 19 lbs.

Stock No. F-5130M Mahogany Net $29.50

LEARN CODE and Theory $6.95 up

78 RPM

EASY, FAST HOME STUDY!

Pass Commercial and Amateur Code Exams, Amateur Theory Exams, for Your FCC License!

4 AMECO Courses Available:

No. 1—NOVICE CODE COURSE. You get and keep 10 recordings (alphabet through 8 W.P.M.). Includes typical FCC type code exams. Free instruction book on learning how to send and receive code the simplest, fastest way; plus charts to check your receiving accuracy; plus an album; all for the low price of only $7.95

No. 2—SENIOR CODE COURSE—You get and keep everything given in the Novice Course except that you get 22 recordings (alphabet through 18 W.P.M.), plus typical FCC type code exams for General class and 2nd class commercial telegraph licenses. All this for only $12.95

No. 3—COMPLETE RADIO THEORY COURSE. A complete, simplified home study theory course in radio covering the Novice, Technician, conditional and general classes—all under one cover—with nearly four hundred typical FCC type questions to prepare you for license exam. No technical background required. You also get, FREE, one year of consultation and a guide to setting up your own Ham station. All for the amazing low, low price of $6.95

No. 4—NEW ADVANCED COURSE. Prepares novice operators for the amateur general class and second class commercial license tests. Contains 12 recordings (8 through 18 W.P.M.) PLUS the complete code book—PLUS typical F.C.C. code examinations for general and commercial tests. ALL for only $6.95
